## Combining design and function

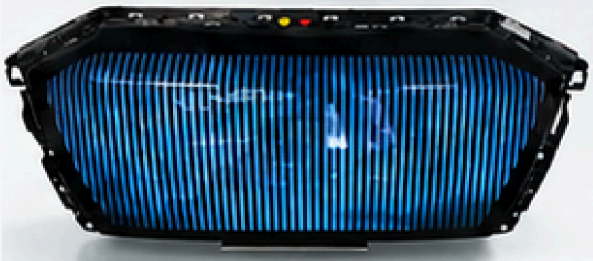

Electromobility requires new vehicle concepts.
At the same time, for example, the elimination of the radiator grille creates additional design surfaces on the vehicle.

Film technology offers all the possibilities for this

- Free-form design (3D)
- Wide variety of designs
- Backlighting / lighting
- Heating integration
- Radar / LiDAR cover

With our pressure forming machines, we have the appropriate equipment technology for manufacturing prototype and series-production components up to a size of 1300 x 700 mm. All processes and methods are specifically tailored to automotive requirements.

**Our services for you:**

- Support with concept development and design
- Design development
- Tool design
- Forming
- Contour trimming (punching/milling)
- Joint sampling
